

THE GUNONG BENOM EXPEDITION 1967

10. PHTHIRAPTERA (INSECTA): CHEWING AND SUCKING LICE

By THERESA CLAY

MALLOPHAGA (Chewing lice) were collected from 26 species of birds and Anoplura (Sucking lice) from two species of mammals. Many of the Mallophaga belong to genera (marked with *) parasitic on the Passeriformes which need revising before accurate determinations can be given; this material will be valuable for such revisions.

MALLOPHAGA

PARASITE	HOST
Menoponidae	
<i>Cuculiphilus snodgrassi</i> (Kellogg & Kuwana, 1902)	<i>Phaenicophaeus diardi</i> . (BN. 122)
<i>Bucerocolpocephalum degnani</i> Elbel, 1967	<i>Anorhynchus galevitus</i> BB. 09
	<i>Calyptomena viridis</i> . BN. 116
	<i>Garrulax erythrocephalus</i> . BN. 372
<i>Myrsidea</i> sp.*	<i>Garrulax mitratus</i> BN. 381
	<i>Stachyris leucotis</i> BN. 432
	<i>Heterophasis picaoides</i> BA. 31
<i>Menacanthus</i> sp.*	<i>Hypsipetes viridescens</i> BA. 08
	<i>Arachnothera magna</i> BN. 319
Laemobothriidae	
<i>Laemobothrion maximum</i> (Scopoli, 1763)	<i>Ictinaetus malayensis</i> BN. 141
Ricinidae	
<i>Ricinus tinctus</i> , Harrison, 1916	<i>Criniger ochraceus</i> BN. 457
Philopteridae	
<i>Craspedorrhynchus</i> sp.	<i>Ictinaetus malayensis</i> BN. 141
<i>Cuculicola</i> sp.*	<i>Phaenicophaeus curvirostris</i> BN. 166
<i>Rallicola unguiculatus</i> (Piaget, 1880)	<i>Phaenicophaeus javanicus</i> BN. 160
	<i>Centropus sinensis</i> BN. 170; BNN. 6

MALLOPHAGA (Contd.)

PARASITE	HOST
<i>Philoaterus</i> sp.*	{ <i>Haypactes diardi</i> . BN. 452 <i>Pitta caerulea</i> BN. 7 <i>Terpsiphone paradisi</i> BN. 461 <i>Rhipidura albicollis</i> BN. 332, 337 <i>Hypsipetes flavulus</i> BN. 397 <i>Hypsipetes viridescens</i> BM. 08 <i>Dicrurus remifer</i> BN. 299, 303; BA. 50 <i>Indicator archipelagus</i> BB. 05
<i>Sturnidoecus</i> sp. Nymphs only.	{ <i>Megalaima henrici</i> NB. 171 <i>Megalaima corti</i> BN. 342, 326 <i>Pomatorhinus hypoleucos</i> BA. 40, 20 <i>Garrulax erythrocephalus</i> BN. 372; BA. 33 <i>Garrulax mitratus</i> BN. 381
<i>Bruteelia</i> sp.*	{ <i>Megalaima henrici</i> BN. 17 <i>Psolopogon pyrolophus</i> BA. 37
<i>Penenirmus</i> sp.*	

ANOPLURA

PARASITE	HOST
<i>Neohaematopinus callosciurvi</i> Johnson, 1959	<i>Callosciurus notatus</i>
<i>Neohaematopinus batuanae</i> Ferris, 1923	<i>Petaurista petaurista</i>
